ADHESIVE HOOK APPLICATION & REMOVAL

RECOMMENDED AREAS

- Non-Porous Tile
- Smooth Drywall
- Glass
- Smooth Metal

DO NOT USE ON

- Rough Tile
- Wood
- Concrete
- Textured Drywall

Note: Ensure the area is completely dry before application.

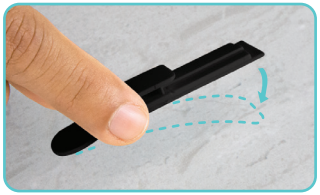

Maximum Weight Limit: 2.5 lbs.

APPLICATION

1. Prepare the desired hanging area by cleaning it with isopropyl alcohol and allowing it to dry completely.

2. Remove the paper backing from the adhesive hook.

3. Position the adhesive strip in the desired location. Firmly press it down for at least 60 seconds.

4. Let the adhesive set to the surface for at least 1 hour before securing the hook and hanging your items.

REMOVAL

1. Remove the hook from the adhesive strip.

2. Hold the plastic with one hand and pull the strip downward with the other to completely remove the adhesive from the wall.

3. Wipe off the wall from any residue if needed.

BENDABLE LOOFAH BRUSH INSTRUCTIONS

REPLACING THE LOOFAHS (No tools required)

- Remove the used loofah tip by unscrewing and then discarding. Screw the new loofah tip on and hand tighten. No tool required.
- We recommend replacing the loofah every 2-3 months.

Care Instructions: Rinse well after each use. Shake off any excess water. Hang to dry in a well-ventilated area.

BENDING THE HANDLE

Readjustments may be required after extended use.

Option 1: Using hands.

Option 2: Using a countertop.

1. Position the middle part of the handle onto a firm straight edge such as a countertop, table, or the seat of a chair. One half should be supported on the flat surface and the other half should be hanging.
2. While holding the flat end down with one hand, bend the opposite end to the desired angle.
